SHERWOOD
SCUBA

What's An Industry Icon?

When you hear the name IBM, you think computers. When you hear Ford, you think cars.

And when you hear Sherwood, you think scuba diving equipment.

That's an industry icon.

Because the giants of any industry are synonymous with that industry. After decades and decades of industry leadership, they almost become that industry.

At Sherwood Scuba, we're quite proud of our position of industry dominance.

We're proud of the fact that our scuba gear is among the most popular in the world. Travel to anyplace on the planet where diving is popular, and you'll find Sherwood gear in use.

We're one of the oldest and most successful manufacturers of scuba equipment. From our early days as a pioneer in the fledgling field of scuba diving to the present, we've been an industry leader for more than half a century.

What That Means To You

We like the view from up here at the top of our industry, and we intend to stay here. And we know we aren't going to remain at the top by resting on our laurels.

That's why ***you*** are so important to us.

Because the only way we can retain our position of industry dominance is by continuing to do ***exactly*** the same thing that got us here – earning the trust of divers just like you.

After all, if we can earn ***your*** trust through our dedication to providing consistently superior products, then we're off to a great start on our next half century. That's why we continue to strive for excellence.

You'd expect nothing less from an industry icon, would you?

MAXIMUS: *SRB7600*

The ideal choice for advanced and professional divers, Maximus is an extremely compact and comfortable regulator that's big on performance. Ideal for all diving environments.

BLIZZARD: *SRB7900*

To develop the Blizzard Sherwood worked closely with safety services personnel that have to depend on their gear to perform in extremely demanding conditions. A time-proven product, the Blizzard has become the top choice of cold-water divers worldwide.

OASIS: *SRB7700*

If you're a warm-water diver who gets that awful feeling of dry mouth, you are going to love the Oasis. Sherwood has exclusively developed two second-stage moisture-retention fins for the Oasis that keep your mouth cool and comfortable all dive long.

MAGNUM: *SRB7300*

This compact, precision-crafted performer is the regulator of choice for many professional and recreational divers. The Magnum meets or exceeds Navy diving tests and all European EN250 standards, including cold water performance tests.

REGULATORS

SR1
SHERWOOD SCUBA

SRB1000

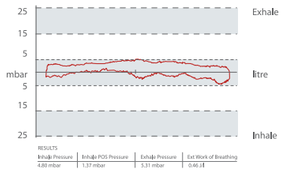
The SR1 packs its advanced technology into a compact case, which employs contemporary styling and utilizes a multitude of cutting edge materials. With superior breathing performance of less than 0.5 joules/liter, W.O.B. at 165 fsw, 62.5 RMV, the SR1 is the most technologically advanced regulator Sherwood Scuba has produced in its storied 50 year history.

1st Stage Features:

- Two-piece piston for precise optimum balance and intermediate pressure control.
- Dry sealed ambient pressure chamber.
- Five low pressure ports located on a 360° swivel.
- Two high pressure ports.

2nd Stage Features:

- External adjustment for lever height.
- Low profile exhaust deflector.
- Pneumatically balanced.
- SMART Demand Lever - reacts to depressurization and relieves load on seat, extending seat life while promoting consistent regulation.
- Available in DIN.
- Super flex hose.
- One touch dual function adjustment.
- NITROX compatible to 40%.
- Free Parts for Life program*.



"The SR1 was this year's show-stopper. It's the first balanced piston first stage we've seen with a dry-sealed spring chamber. This innovative design provides the dry-sealed/reduced corrosion benefits of a diaphragm reg, with the performance/durability benefits of a piston reg. The second stage is lightweight and has a dual-purpose control knob that adjusts both breathing resistance and venturi effect. The reg delivers chart-topping breathing performance even at extremes, is bone dry and easy to use at depth. It looks good too, with a polished chrome over brass first stage and a velvety finish on the second stage to make it easier to hold onto. Pretty, with plenty of muscle."
- Scuba Diving Magazine

**See your Authorized Sherwood Scuba Dealer for details.*

BRUT

SRB9110

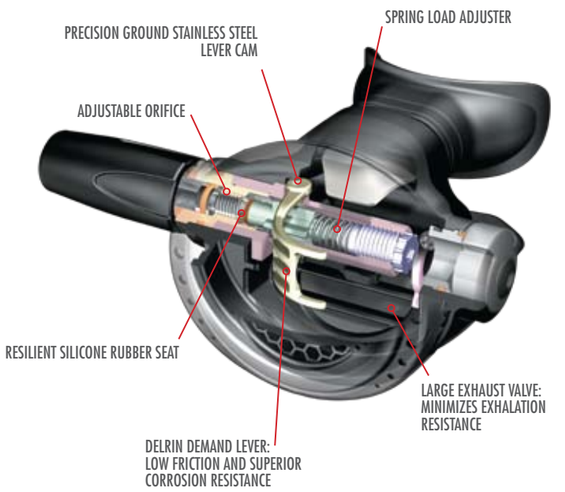
Totally redesigned to provide outstanding breathing performance. The BRUT maintains dedication to rugged reliability combined with ease of maintenance. The BRUT has been the overwhelming favorite for rental applications for decades because of its simple reliability.

1st Stage Features:
BRUT FIRST STAGE

- Balanced-piston first stage for constant intermediate pressure control over a large range of supply pressures.
- Patented Dry–Sealed spring chamber maintains clean interior and excludes first stage icing in cold water.
- High capacity inlet filter.
- Four LP ports & two HP ports for versatile hose routing options.

2nd Stage Features:

- Larger diaphragm for optimal response to inhalation.
- Larger exhaust valve for decreased exhalation resistance.
- Resilient silicone rubber seat.
- Precision - ground stainless steel cam and Delrin lever for smooth effortless breathing.
- High impact housing for rugged applications.



PRECISION GROUND STAINLESS STEEL LEVER CAM
SPRING LOAD ADJUSTER
ADJUSTABLE ORIFICE
RESILIENT SILICONE RUBBER SEAT
LARGE EXHAUST VALVE: MINIMIZES EXHALATION RESISTANCE
DELRIN DEMAND LEVER: LOW FRICTION AND SUPERIOR CORROSION RESISTANCE

octos

SR1 OCTO: *SR4002*

SHERWOOD OCTO: *SR9902*

The SR1 and the Sherwood Octo are the two best breathing octos ever made. No other octos come close to their incredible performance.

GEMINI: *SR9000*

The Gemini replaces the conventional BC power inflator and backup second stage regulator. With this two-in-one breathing device, an extra hose is eliminated, giving you a less cumbersome dive. The power inflation, oral inflation, and exhaust trim valve are designed to remain similar to standard BC inflators, so you are already familiar with the Gemini's operating system.

DUAL OCTO: *SR7206*

The Dual Octo is a great addition to any diver's gear bag. This octo, just as the name indicates, allows the mouthpiece to be installed in two separate positions and allows any diver maximum comfort, and never sacrifices Sherwood's history of reliability and durability.

MINIMUS: *SR3108*

The Minimus has a uniquely designed mouthpiece position that allows you to give extra air to divers at your left or right-hand side. Because this octo is 35% smaller than most standard octos, your dive is more comfortable.

BUOYANCY COMPENSATORS

You know that when you're on a dive, you need to be able to keep your buoyancy firmly under control. It's a matter of safety and comfort. We've designed our Buoyancy Compensators to be the best at helping you do exactly that.

But we've also designed each of our BCs to be easy to use.

Through the years, we've learned a lot about what divers need from their dive gear. And we've learned that it's not enough to make gear that is tough and reliable. Your gear should also make diving easier, not more difficult.

After all, we've been manufacturing scuba gear for more than 50 years. We've accumulated a lot of hard-won wisdom in that time. Wisdom about how to design and manufacture gear that offers world-class reliability and ease-of-use.

That's why we know better than to load our BCs down with a lot of extra gadgetry that would only interfere with their usability.

That's why we know how important it is to use time-proven materials in the construction of our BCs. Materials that will stand up to years of hard use in the harshest of environments.

And that's why we know that it's important to integrate function with form. Sure, our BCs look good. But we make certain that our stylish designs don't come at the expense of the streamlining that is so crucial in minimizing drag.

With time-tested and reliable features such as our CQR2 integrated weight system, you'll find that our BC's offer the ultimate in reliability and usability.

After all, diving is serious business no matter what kind of diving you do. Whether you're a professional diver or dive for fun, you need gear that is capable, reliable and easy to use.

With a Sherwood BC, you can depend upon being able to fine-tune your buoyancy with ease and precision. That'll make your working dives a bit less tiring and tedious, and your fun dives a bit more enjoyable.

Sherwood's CQR2 Weight Release system provides a simple and reliable means to carry weights on your BC. Weight pockets are easily loaded into the front lobes of the BC and secured with the patented 2" side release clip.

CQR.2

Maintaining neutral buoyancy is one of the key elements for a relaxed, comfortable dive. The CQR2 System is specifically designed to accommodate your natural dive posture while allowing full control of buoyancy.

The unobstructed release handles are easily reached to quickly detach the individual weight pockets. The quick release is also convenient for reboarding the dive boat. Simply detach your weights and hand them over to your on-board dive mates.

Increase the functionality of your BC.

Equip your Sherwood BC with the optional AKONA Pro Kit. This kit contains an LED waterproof flashlight, dive knife, two cable retractors and the tools to get them all attached.

AXIS

AXIS: *Back Inflation BC*

- Four stainless steel D-rings.
- Comfortable neoprene neckline.
- Adjustable shoulder straps.
- Compact back mount air cell for the traveling diver.
- Right and left shoulder, rear dump, and manual inflator.
- Four point air release valves for optimum buoyancy control.
- AKONA safety tube surface-signaling device included.
- Two non-releasing trim weight pockets for enhanced stability.

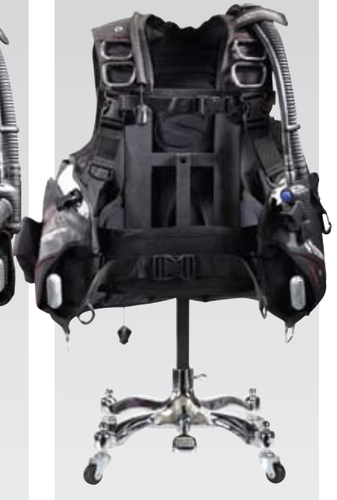
AVID

AVID: *Jacket Style BC*



- Six convenient stainless steel D-rings.
- Adjustable shoulder straps.
- 3-D air cell that wraps around the body for exceptional stability.
- Utility side pockets.
- Right and left shoulder, rear dump, and manual inflator.
- Four point air release valves for optimum buoyancy control.
- Two non-releasing trim weight pockets for enhanced stability.
- Removable and adjustable sternum strap.
- Custom pocket for optional AKONA safety tube.
- Cummerbund extender available.

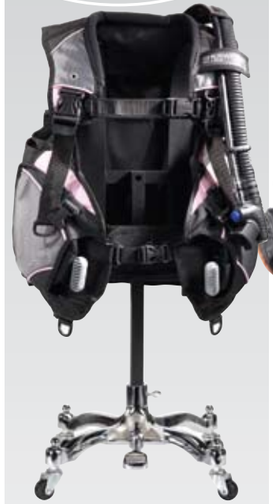
LUNA

LUNA: *Jacket Style Women's BC*



- Contoured design specifically for women.
- Two non-releasing trim weight pockets.
- Removable and adjustable sternum strap.
- Cummerbund extender available.
- Easy oral and power inflation.
- Two roomy, zippered pockets.
- A 3-D designed air cell and elastic removable sternum strap and front closure that allow full inflation while eliminating "squeeze".
- Sherwood's Halfpac combining the comfort of a soft-pack BC with the stability of a hard-pack.
- Adjustable shoulder straps.
- Thick padding and a plush nylon interior.

WARNING! Safe use of BC's with integrated weights requires a complete understanding of their operation and limitations. Consult the BC operating manual and your diving instructor to be certain you understand how to weight yourself properly and what to do in an emergency. Failure to understand and act appropriately could result in serious injury or death.

INSIGHT: *CR3709*
InSight Navigational Console - NITROX computer with pressure gauge and compass. Also available in metric (CR3709M)

INSIGHT: *CR2709*
InSight Compact Console - NITROX computer with pressure gauge. Also available in metric (CR2709M)

WISDOM 2: *CG9125*
Wisdom 2 Console - NITROX computer shown with compass and quick-disconnect. Multiple configuations availble.

PROFILE: *CR3509*

PROFILE: *CR2509*
Profile Compact Console - AIR computer with pressure gauge. Also available in metric (CR2509M)

Insight

- Intuitive display popularized by Wisdom model.
- Expanded memory for dive profiles - access to up to 110 dives.
- Deep stop reminder - conforms to latest theories recommending deep stops for dives that exceed 80 feet.
- Digital and bar graph indicators for nitrogen or oxygen limits.
- Audible and visual alarms – diver selectable.
- Air/Nitrox or Gauge operating mode.
- Log book data: up to 50 dives.
- Consumer replaceable battery.
- PC downloadable profiles.
- Excellent companion to the Wisdom 2.

wisdom 2

- Expanded memory for dive profiles - access to up to 110 dives.
- Deep stop reminder – conforms to latest theories recommending deep stops for dives that exceed 80 feet.
- Intuitive 2-button operation.
- Dive Time Remaining feature – calculates and displays dive time remaining based on current consumption rate or available no deco time remaining.
- Air integrated feature – Display air supply remaining (PSI).
- Audible and visual alarms – diver selectable.
- DECO warnings and calculations.
- Air, Nitrox or Gauge operating modes.
- Metric or Imperial units
- EPC downloadable.

profile

- Air/Nitrox or Gauge operating mode.
- Deep stop reminder – conforms to latest theories recommending deep stops for dives that exceed 80 feet.
- Digital and bar graph indicators for nitrogen, oxygen limits and ascent rate.
- Log book data: up to 50 dives.
- Consumer replaceable battery.
- Economical companion to the Wisdom 2.
- Easy console upgrade - Profile fits all current Sherwood consoles and can replace your depth gauge.

DOWNLOAD CABLE:
SDK400
Download cable available for the Wisdom 2 and the InSight computers. Go to www.SherwoodScuba.com for software.

WISDOM 2 BAG:
SWB418
Protect your valuable computer console with this padded carrying case. Designed specifically for the Wisdom 2 but conveniently fits other Sherwood consoles.

GAUGES

COMPACT CONSOLE:
Depth gauge with maximum depth indicator. Pressure guage with water temp. Easy to read high contrast dials.
1.75" diameter
CG2216 - 200' / 5000 PSI
CG2216M - 60 meters / 400 BAR

CG2216

NAVIGATIONAL CONSOLE:
Depth gauge with maximum depth indicator. Pressure guage with water temp. mounts on back. Compass. Easy to read high contrast dials.
1.75" diameter
CG3206 - 200' / 5000 PSI
CG3206M - 60 meters / 400 BAR

CG3206

PRESSURE GAUGE:
Pressure guage with water temp. Easy to read high contrast dial.
1.75" diameter
PG060A - 5000 PSI
PG060MA - 400 BAR

PG060A

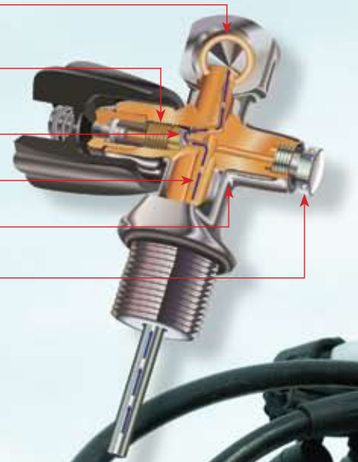
InSight and Profile computers, depth gauge and compass are available in wrist and hose mount options.

SHERWOOD SCUBA

MANUFACTURING EXCELLENCE
1955 55 YEARS 2010
SHERWOOD SCUBA

5000K VALVE: *5000K-48*

The most widely used scuba valve in the world. The critical link between your regulator and tank, our patented Sherwood valve was designed specifically to handle today's high-performance regulators.



O-ring outlet protected by pressure releasing crimp to resist "pop-out"

Teflon-coated plug threads that mean grease-free lubrication for the life of the valve

An all-Teflon seat, making it the smoothest operating and most durable valve you can buy

High air-flow capacity

Unique styling provides a convenient tank handle

A specially designed burst-disc assembly that distributes escaping air evenly so your tank won't spin or tip if your burst disc vents

Sherwood cylinders come in a complete assortment of sizes from a small 6 cu.ft. to 100 cu.ft., as well as a variety of colors and finishes.

Sherwood Scuba has been building valves and regulators for 55 years. During that time we've also built a reputation for reliability, ruggedness and low maintenance that has made us the number one choice of dive shops, resort rental operators, fire departments and dive search-and-rescue teams worldwide.

KINESIS EX: *FN11x*
Powerful dive fin features the patented OPB hinge point. Co-molded urethane and TPR blade produces exceptional thrust.
Open heel with quick-release straps.
Black (BK) only
Available sizes:
SM (FN112); REG (FN113); XL (FN114)

KINESIS: *FN12x*
Performance dive fin features the patented OPB hinge point. Similar properties to the Kinesis EX with more flexible blade.
Open heel with quick-release straps.
Blue (BU) and Yellow (YL)
Available sizes:
SM (FN122); REG (FN123); XL (FN124)

SPINTA: *FN23x*
Exceptional dive / snorkel fin featuring the patented OPB hinge point. Unique co-molded blade provides efficient transfer of kick energy. Open heel with quick-release straps. Blue (BU) and Yellow (YL)
Available sizes:
SM (FN232); REG (FN233); XL (FN234)

TREK: *FN14x*
The Trek utilizes the split fin technology which produces a propeller-like thrust. Open heel with quick-release straps.
Black (BK) only
Available sizes:
SM (FN142); REG (FN143); XL (FN144)

CRYSTAL CLEAR
LENS TECHNOLOGY

ALLURE: *MA09*
Crystal Clear lens technology improves clarity and light transmission.
Colors:

MAGFOUR: *MA40*
Dual lenses with built-in +1.75 lower lenses angled for optimum magnification.
Colors:

ECLIPSE: *MA33*
Over-mold, low profile frame design is compact and comfortable.
Colors:

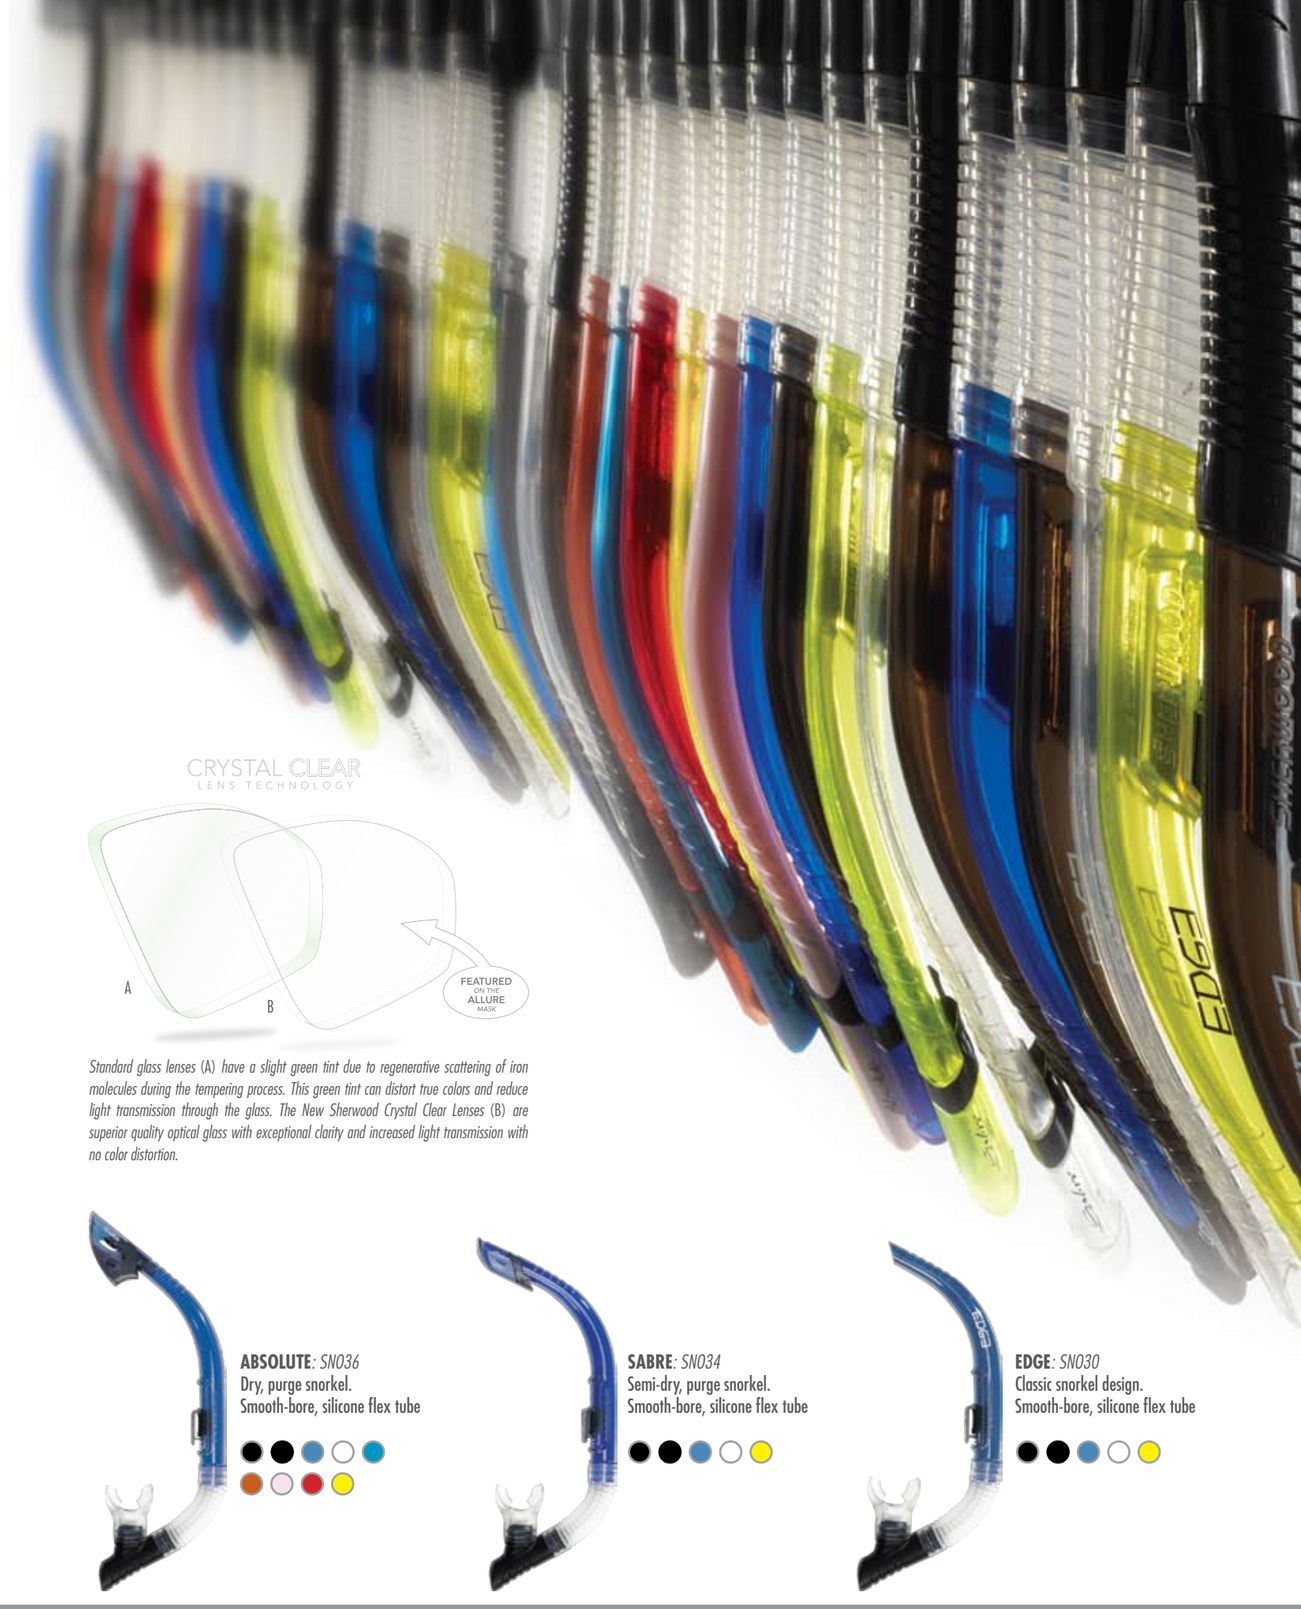
ORACLE: *MA32*
Large dual lenses. Quick disconnect buckles. Low profile design.
Colors:

RONA: *MA35*
Progressively designed frameless mask brings lens closer to face for enhanced field of view.
Colors:

MAGNUM 2: *MA20*
Dual tempered glass lenses available in diopters -1.0 through -8.0.
Colors:

MAKO: *MA18*
Unique sub-frame design and single lens. Frosted silicone.
Colors:

MAGNUM EX: *MA15*
Also available as a purge mask *MA16*.
Colors:



CRYSTAL CLEAR
LENS TECHNOLOGY

Standard glass lenses (A) have a slight green tint due to regenerative scattering of iron molecules during the tempering process. This green tint can distort true colors and reduce light transmission through the glass. The New Sherwood Crystal Clear Lenses (B) are superior quality optical glass with exceptional clarity and increased light transmission with no color distortion.

ABSOLUTE: *SN036*
Dry, purge snorkel.
Smooth-bore, silicone flex tube

SABRE: *SN034*
Semi-dry, purge snorkel.
Smooth-bore, silicone flex tube

EDGE: *SN030*
Classic snorkel design.
Smooth-bore, silicone flex tube
